☐ Please check if any of the above information has changed since previous year.

II. MINING AND RECLAMATION

1. Was the mine active during the past year? Yes ☐ No ☒

2. If active, how much ore or mineral was mined? None

3. Briefly describe any new or additional surface disturbances that occurred during the past year. This description should include the type of work performed, volume of material moved, and the acreage affected.

None. All sampling was done within a prescribed 5 acre tract
with no surface disturbance. Arrangements have been made with
the Vernal office of the BLM to correct specific problems which
was associated with the operations from previous years.

4. Briefly describe the reclamation work performed during the past year. This description should include acreage reclaimed, methods employed, and an evaluation of the results.

No reseeding or reclamation work was done during 1990. No new surface
disturbance occurred. The gravels which had been previously mined
were run through a sluice box and a centrifuge bowl on a test basis
which involved about 1,100 cubic feet of gravels. Operator plans to
work with the local BLM office this Spring to correct any problems.

5. What was the total unreclaimed acreage at years end? 1.2 acres

6. Briefly summarize mining and reclamation planned for the upcoming year.

Operator plans to conduct surface sampling and run-through
analysis of surface outcrops to determine economic viability of a
pilot stage mining operation.

NOTE: Section III., "Additional Information" applies only to large mining operations.

III. ADDITIONAL INFORMATION

1. An updated surface facilities map should be attached if there have been significant changes since the previous map was submitted.
2. Any monitoring results or other reports that are required under the terms of the approved notice of intention should also be attached.
